# TABLE OF CONTENT

THE

# DREAM PAGE

Take a moment to reflect on who you are and what inspires you.  
There are no right or wrong answers. Just write what feels true to you.

**What are your dream jobs?**

*e.g. Likes: Learning about cultures, maths  
Dislikes: Crowds, competing with others*

**What are your likes and dislikes?**

*e.g. Strengths: Independent, sociable, reliable  
Weaknesses: Stubborn, impatient*

**What are your strengths and weaknesses?**

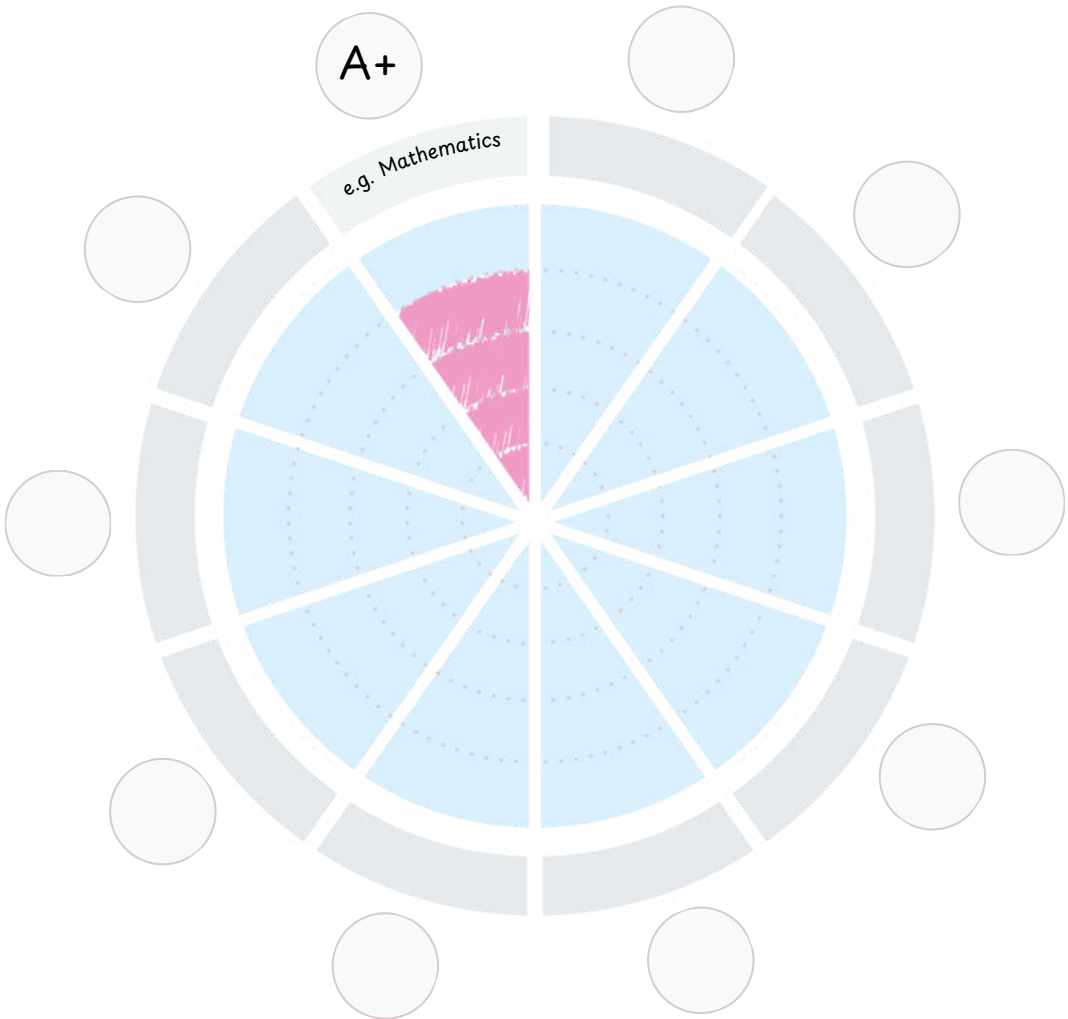

**What are your hobbies and favourite pastimes?**

**YOUR**

# FAVOURITE SUBJECTS

Your favourite subjects can reveal what you're naturally drawn to, and where your strengths might grow.

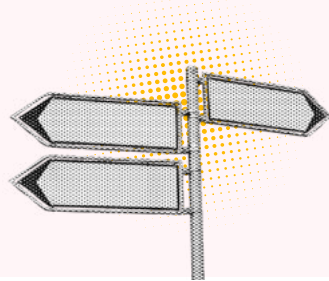

- List all the subjects you've taken in school.
- Shade each segment to indicate how much you enjoy the subject.
- Write your grade for each subject in the circles.

**YOUR**

# INTEREST TYPE

Understanding your RIASEC interest type can guide you towards courses and careers where you'll feel most at home.

Finish the statement by ticking the boxes that relate to you the most. You can tick more than 1 box for each section.

## I enjoy...

Building things out of LEGO

Reading science fiction

Cooking without recipe

Helping people solve their problems

Being a team leader

Creating a checklist

Camping or going on hikes

Conducting science experiments

Painting or other creative pursuits

Doing volunteer work

Planning and organising events

Planning my day

## I'm good at...

Practical work

Solving complex math problems

Sketching and designing

Listening to others

Persuading others to follow my lead

Keeping things organised

Playing sports

Critical thinking

Playing a musical instrument

Working in a team

Communicating my ideas

Working with numbers

### My friends say I am...

### I prefer...

Hands-on		Showing rather than explaining	
Analytical		Working alone instead of in a team	
Sensitive		Aesthetics more than functionality	
Generous		Working in a team rather than alone	
Enthusiastic		Leading rather than following	
Responsible		Routine more than spontaneity	
Brutally honest		Things more than people	
Intellectual		Thinking more than doing	
Creative		To be unique rather than normal	
Idealistic		Making the world a better place	
Confident		To be the best instead of average	
Meticulous		Stability over flexibility	

# YOUR FUTURE LANES

Everyone has certain types of work that naturally catch their attention. This can guide you towards career paths that genuinely interest you.

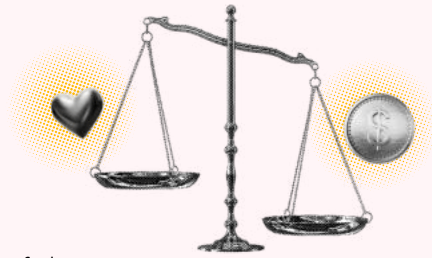

- Look through jobs and simply circle the ones that sound interesting.
- Don't worry about things like qualifications, experience, or salary — just go with what sounds cool or fun to you!

Political Scientist	Prompt Engineer	Chief Executive Officer	Pilot	Construction Manager
Legal Clerk	Web Developer	Business Operation Manager	Accountant	Interior Architect
Lecturer	Actuarial Analyst	Financial Manager	Data Scientist	Landscape Architect

Film Director	Durian Orchard Manager	Esports Marketing Manager	Event Planner	Cosmetologist
Musician and Singer	Park Naturalist	Rehabilitation Counselor	Fitness Coordinator	Baker
Photographer	Industrial Ecologist	Real Estate Consultant	Funeral Manager	Airline Cabin Crew

# YOUR WORK VALUES

Understanding what matters most to you in a job can help you identify the workplaces and roles where you'll feel satisfied and motivated.

- Read each statement and shade the one that best reflects how you feel.
- There are no right or wrong answers — just pick the one that matches your feelings the most!

I prefer pleasant teammates than high-performing but moody ones

I prefer high-pressure jobs where success is clearly measured

I'd rather use my best skills in a stressful job than chill in an easy one

Working at a place with better culture is better than a famous one

I prefer structured guidance over "figure it out as you go"

Having full control over my work is worth the extra pressure

I'd rather have a high-status job I dislike than a low-status job I love

I'd quit a high-paying job if it ever challenged my values or ethics

I'd pick a meaningful job helping others over one that makes me rich

Overcoming something challenging is better than a stress-free day

Being the leader is worth the stress and responsibility of others

I'd choose a guaranteed boring job over a risky dream job

Being creative at work matters more than efficiency and productivity

I'd rather have a supportive boss than a brilliant but uncaring one

I'd rather have my work appreciated publicly than privately

Physical comfort at work beats intellectual stimulation

Financial comfort matters more than personal fulfilment

Working without supervision is better even if I may feel lost at times

# YOUR WORK STYLES

Everyone approaches work differently. Understanding your natural work style can help you find jobs that fit how you think, act, and solve problems best.

- Read each scenario and choose the option that best describes how you would naturally respond.
- Write your answer in the box provided.

## **You have an important class assignment. What's your first move?**

- A. Start first and figure things out along the way
- B. Have a general idea of what to do and adjust as you go
- C. Set clear goals and plan how to achieve them

## **You've been trying to solve a problem for quite some time. What do you do?**

- A. Take a short break and come back to try again
- B. Move on and only come back to it if it's important
- C. Keep trying different approaches until you figure it out

## **The school is looking for volunteers to organise an event. What do you do?**

- A. Wait to see if they need more volunteers before deciding
- B. Consider signing up if your friends are interested
- C. Immediately sign up and ask what responsibilities you can take on

## **Your group project team seems confused about how to start. What do you do?**

- A. Wait for someone else to take the lead
- B. Suggest a plan and offer to coordinate everyone's tasks
- C. Share some ideas and see if others want to build on them

## **During a club meeting, there's disagreement about which activity to pursue. You...**

- A. Prefer to just go with the group's decision
- B. Speak up to present your viewpoint clearly and try to build consensus
- C. Share your opinion if someone asks for it

## **When working with others, you usually...**

- A. Make sure everyone feels included and heard
- B. Cooperate with most people easily
- C. Prefer to handle your part quietly

**A classmate seems upset and is sitting alone during lunch. You...**

- A. Give them space to sort it out
- B. Send them a message later
- C. Go over to check if they're okay

**You have the option to work on an assignment alone or with a partner. What's your preference?**

- A. Prefer to work alone so you can focus
- B. Definitely prefer to work with a partner to bounce ideas around
- C. Either way works, depending on the assignment

**A teammate criticises you in front of everyone. What do you do?**

- A. Defend yourself immediately and explain why you're right
- B. Feel frustrated but keep it to yourself and address it later
- C. Stay calm, acknowledge their feedback, and discuss it constructively

**You have three tests, a project deadline, and a family event all happening this week. What do you do?**

- A. Create a schedule to handle everything systematically
- B. Focus on the most urgent things and deal with stress as it comes
- C. Feel overwhelmed and tackle things as they come up

**Your teacher announces a major change to the project requirements halfway through. You...**

- A. Adjust quickly and work easily with the new direction
- B. Feel frustrated about having to redo work you've already done
- C. Take a while to adapt but manage to make the required changes

**When you see others bending rules a bit, you...**

- A. Stick to what's right, even if no one notices
- B. Avoid getting involved
- C. Go along if it seems harmless

**You promised to help a friend with their presentation, but your favourite show's finale is on tonight.**

- A. Ask if you can reschedule since something came up
- B. Help your friend, but ask if you can make it quick
- C. Keep your commitment and help your friend as planned

**You're reviewing your essay before submission and notice a few minor errors. What do you do?**

- A. Fix the obvious errors and submit
- B. Check the entire essay again to catch any other mistakes
- C. Fix the errors you noticed and do a quick final read

**Your science experiment gave unexpected results that don't match the hypothesis. What do you do?**

- A. Systematically analyse each step to identify what caused the difference
- B. Try the experiment again as you may have made a mistake
- C. Review your procedure to see if you made any obvious errors

**Your teacher gives you a creative assignment with very few guidelines. You...**

- A. Appreciate the freedom and develop your own unique approach
- B. Ask the teacher for more specific requirements and examples
- C. Come up with ideas but check with the teacher to make sure you're on track

**When you're unsure how to do something, you...**

- A. Look it up or ask after a quick attempt
- B. Ask for help immediately
- C. Try to figure it out on your own first

**You're planning a study strategy for your upcoming exams. You...**

- A. Use a mix of your own ideas and suggestions from others
- B. Research and create your own customised study plan
- C. Ask teachers, friends, and family for advice on what to do

**Your school club needs fresh ideas to increase member participation. What do you do?**

- A. Brainstorm several creative, unconventional approaches
- B. Suggest some improvements to what's worked before
- C. Stick with tried and proven methods from previous years
